An open letter to our citizens of Cleveland, Dayton and Liberty:

In light of the reluctance that some folks may have in presenting themselves for the COVID 19 vaccinations, we are strongly encouraging all of our citizens to get vaccinated with the Pfizer shots, the Moderna shots or the single dose from Johnson & Johnson. The vaccinations have been shown to be very effective in protecting those who receive the recommend doses and we very much want as many of our citizens who are medically eligible to take the shots. The science behind the vaccines is proven, is sound and is indisputable. The mainstream medical community is solidly behind the need and the benefits, to not only those who receive the shots, but also the neighbors and friends of all the recipients. If you have not already done so, seek out a vaccination site or facility – the doses are now readily available to virtually all. Be kind to yourself and considerate of your family and all those who you may come in contact with – take a shot or shots for you and them.

Thanks for your cooperation.

Caroline Wadzeck
